```

The present DNA sequence is a recombinant adenovirus-associated vector, CC (rAAV) construct pVm4.1cP8deitaB. This expression vector comprises the CC promoter, first intron (-573 to +985) of human elongation factor-lalpha CC (EFlalpha) gene, human Factor VIII coding sequence (hGH). This sequence is CC inserted between the AAV inverted terminal repeat (ITR) regions. The CC inserted between the AAV inverted terminal repeat (ITR) regions. The CC first 57 bp encoding the 19 amino acid signal peptide, Al and A2 domains CC and 5 amino acids from the N-terminus of the B domain. The light chain CC segment comprises the C-terminus of the B domain and the A3, CC land C2 domains. Both the heavy and light chain segments are cloned control sequences, that directs the transcription and translation of the CC control sequences, that directs the transcription and translation of the CC factor VIII gene. The adeno-associated viral vectors are used for gene conficency, because of their broad host range, safety profile and duration in the inferted hosts.

The rAAV vector provides high level and long term expression of biologically active clotting factor VIII in vivo. The present sequence is pVM4.1cF8-B vector without the plasmid backbone. It comprises human elongation factor 1 (EF1) promoter, B.-domain deleted human factor VIII coding sequence, a poly A signal and AAV inverted terminal repeats (ITRs) at the ends. The vector encodes both the light and heavy chains of human factor VIII separated by 14 amino acids of the B domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 4999 BP; 1375 A; 1151 C; 1155 G; 1318 T; 0 other;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     В
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      δÃ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          DЬ
                                                             hrVIII coding region comprises the heavy chain gene segment with the first 57 bp encoding the 19 amino acid signal peptide, Al and A2 domains and 5 amino acids from the N-terminus of the B domain. The light chain segment comprises the C-terminal 85 amino acids of B domain and the A3, segment comprises the C-terminal 85 amino acids of B domain and the A3, cl and C2 domains. Both the heavy and light chain segments are cloned into the same plasmid seperated by 42 nucleotides coding for 14 residues of the B domain, that is deleted. This plasmid is operably linked to control sequences, that directs the transcription and translation of the Factor VIII gene. The adeno-associated viral vectors are used for gene therapy to treat haemophilia. This method allows prolonged expression of therapy, because of their broad host range, safety profile and duration of expression in the infected hosts.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        20-OCT-1998;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The present DNA sequence is a recombinant adenovirus-associated vector, (rAAV) construct, pAAV-F8-1. This expression vector comprises the HNF 3 albumin promoter, the first intron (-573 to +985) of human elongation factor-lalpha (perlalpha) gene, human Factor VIII coding sequence (hFVIII) and polyadenylation signal from human growth hormone (hGH). This sequence is inserted between the AAV inverted terminal repeat (ITR) regions. The
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   WPI; 2000-339536/29.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Couto LB,

                                                                                         Qy
                                                                                                                                                                                                                                               CC The present invention relates to a method for treating a subject CC suffering from a blood clotting disorder. The method comprises CC administering a recombinant adeno-associated virion (rAAV) comprising CC a nucleotide sequence encoding the light chain of factor VIII and a CC second recombinant adeno-associated virion comprising a nucleotide sequence encoding the heavy chain of factor VIII. The rAAV vector is cuseful in gene therapy for treating haemophilia A in mammals, in CC particular humans. The rAAV vector provides high level and long term cappersion of biologically active clotting factor VIII in vivo. The present sequence is pAAV-F8-1 vector without the plasmid backbone. It comprises HNF-3.mouse albumin promoter, a synthetic intron based on human elongation factor lalpha (EFlalpha) and immunoglobulin GC LigG) intron sequences, B-domain deleted human factor VIII coding sequence, poly A signal based on rabbit beta-globin sequence and AAV inverted terminal repeats (ITRs) at the ends. The vector encodes both the collish and heavy chains of human factor VIII.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      AAD08612
